Description Notes Letter asks Young to call Mr. Miners regarding the spraying of
Herbicide Blue. Item 4863 includes notes of Young's
response.

OCT 04 1977

Capt Young

A1 -

AT your convenience please call

Mr. Miners - From O+M, CE shop

at Davis-Monthan AFB. AV 361-3864
3225

He is the contact man on

The spraying of H.B. in The bone yard. I think you may want to talk over The use of that material, The fact that it is not pure and clean like that he has used in The past.

Also, is This The best Time to use it, or should it be held until spring?

How are The barrels going to be rinsed? and How and where will They be disposed of?

We may just want to hurry up and get rid of it ASAP even if This isn't The best Time of year to do That.

Maj Tremblay has the TWX giving specific instructions for use and application of Blue and Final disposal of barrels. Capt Doane may also have that info.

Attached is

- 1) Characterization of material in The 13 Drums from J.I.
- 2) TWX on instructions for Blue
- 3) 40 CFR 165
- 4) Use label

There is one more sheet some place that came from a special meeting in Washington giving permission for the Air Force to use this material at various specified bases. I can't find it however at the moment. Don't think it is that important right now.
